## COVID-19

### MEDIA RELEASE

(Mason City) – Wednesday, June 17<sup>th</sup>, 2020

Contact: Jeremy Otto, Public Information Officer, (641) 421-9333

## COVID-19 Joint Information Center Update

### Data Snapshot

- 24,403 total lab-confirmed cases of COVID-19 in Iowa (06/17/2020).
  - 49 total lab-confirmed cases of COVID-19 in Cerro Gordo (06/17/2020).
- 672 deaths in Iowa
  - 1 death in Cerro Gordo
- 5,354 COVID-19 tests administered at the mobile testing unit (06/16/2020).

A status report of monitoring and testing of COVID-19 in Iowa, including county-level data, provided by the Iowa Department of Public Health can be found at <https://coronavirus.iowa.gov/#CurrentStatus>.

### Guidance and Considerations for Travel Within the United States During COVID-19 Pandemic

Tourist season is here. It is important to follow guidelines for travel within the United States during the COVID-19 pandemic.

- If you are thinking about traveling away from your local community, ask:
  - **Is COVID-19 spreading where you are going?**  
You can get infected while traveling.
  - **Is COVID-19 spreading in your community?**  
Even if you do not have symptoms, you can spread COVID-19 to others while traveling.
  - **Will you or those you are traveling with be within 6 feet of others during or after your trip?**  
Being within 6 feet of others increases your chances of getting infected and infecting others.
  - **Are you or those you are traveling with more likely to get very ill from COVID-19?**  
Older adults and people of any age who have a serious underlying medical condition are at higher risk for severe illness from COVID-19.
  - **Do you live with someone who is more likely to get very ill from COVID-19?**  
If you get infected while traveling you can spread COVID-19 to loved ones when you return, even if you don't have symptoms.
  - **Does the state or local government where you live or at your destination require you to stay home for 14 days after traveling?**  
Other state and local governments may require people who have recently traveled to stay home for 14 days.
  - **If you get sick with COVID-19, will you have to miss work or school?**  
People with COVID-19 need to stay home until they are no longer considered infectious.
  - **Are you sick, or are any of your travel partners sick?**  
If you are sick or if you have been around someone with COVID-19 in the past 14 days, do not travel. Do not travel with someone who is sick.

## COVID-19

- If you travel, protect yourself and others during your trip:
  - **Clean your hands often.**

Wash your hands with soap and water for at least 20 seconds, especially after you have been in a public place, after touching surfaces frequently touched by others, after blowing your nose, coughing, or sneezing, and before touching your face or eating.

If soap and water are not available, bring and use hand sanitizer that contains at least 60% alcohol. Cover all surfaces of your hands and rub your hands together until they feel dry.
  - **Avoid touching your eyes, nose, or mouth.**
  - **Avoid close contact with others.**

Keep 6 feet of physical distance from others.
  - **Wear a cloth face covering in public.**
  - **Cover coughs and sneezes.**
  - **Pick up food at drive-throughs, curbside restaurant service, or stores.**
- Considerations for Types of Travel:
  - **Air travel.**

Air travel requires spending time in security lines and airport terminals, which can bring you in close contact with other people and frequently touched surfaces. Most viruses and other germs do not spread easily on flights because of how air circulates and is filtered on airplanes. However, social distancing is difficult on crowded flights, and you may have to sit near others (within 6 feet), sometimes for hours. This may increase your risk for exposure to the virus that causes COVID-19.
  - **Bus or train travel.**

Traveling on buses and trains for any length of time can involve sitting or standing within 6 feet of others.
  - **Car travel.**

Making stops along the way for gas, food, or bathroom breaks can put you and your traveling companions in close contact with other people and surfaces.
  - **RV travel.**

You may have to stop less often for food or bathroom breaks, but RV travel typically means staying at RV parks overnight and getting gas and supplies at other public places. These stops may put you and those with you in the RV in close contact with others.
- Anticipate travel needs:
  - **Medicine.**

Bring enough of your medicine to last you for the entire trip.
  - **Hand Sanitizer**

Pack enough alcohol-based hand sanitizer (at least 60% alcohol) and keep it within easy to reach.
  - **Personal protective equipment.**

Bring a cloth face covering to wear in public places.
  - **Food and water.**

Prepare food and water for your trip. Pack non-perishable food in case restaurants and stores are closed.

## COVID-19

- **Disinfecting and cleaning.**  
If you are considering cleaning your travel lodgings, see CDC's guidance on how to clean and disinfect.
- State and local travel restrictions.
  - **Follow state and local travel restrictions.**  
For up-to-date information and travel guidance, check the state or local health department where you are, along your route, and at your planned destination. While you are traveling, it is possible a state or local government may put into place travel restrictions, such as stay-at-home or shelter-in-place orders, mandated quarantines upon arrival, or even state border closures. Plan to keep checking for updates as you travel.
- Frequently asked questions.
  - **Is it safe to travel to visit family or friends?**  
Travel increases your chances of getting and spreading COVID-19. Before you travel, learn if coronavirus is spreading in your local area or in any of the places you are going. Traveling to visit family may be especially dangerous if you or your loved ones are more likely to get very ill from COVID-19. People at higher risk for severe illness need to take extra precautions.
  - **Is it safe to travel to campgrounds/go camping?**  
Going camping at a time when much of the United States is experiencing community spread of COVID-19 can pose a risk to you if you come in close contact with others or share public facilities (like restrooms or picnic areas) at campsites or along the trails. Exposure may be especially unsafe if you are more likely to get very ill from COVID-19 and are planning to be in remote areas, without easy access to medical care. Also be aware that many local, state, and national public parks have been temporarily closed due to COVID-19.

For more information on how to protect yourself and others during travel within the United States please visit [www.cdc.gov/coronavirus/2019-ncov/travelers/travel-in-the-us](http://www.cdc.gov/coronavirus/2019-ncov/travelers/travel-in-the-us)
